Strategic Insights & Trends

OpenAI Alumni Network = Multi-Deal Cluster

Three leads (Zero Shot Fund, Worktrace AI, Syntheify) are connected through OpenAI alumni. A single warm intro to Evan Morikawa or Shawn Jain could unlock all three deals simultaneously. Priority: identify any existing connection into this ecosystem.

Funding Velocity = PR Window

Both Pillar (\$20M, April 14) and Round Treasury (\$6M, April 13) raised in the last 48 hours. Post-funding is the highest-intent moment for PR/marketing outreach. Act within 1-2 weeks while news is warm.

AI Adoption Gap Creates Consulting Demand

Q1 2026 saw \$242B (80% of global VC) flow into AI. Ontora, Worktrace AI, and Syntheify are building products for companies still in early AI adoption. Monitoring their customer announcements could surface 10-20 additional warm leads.

Legal Tech Entering Brand-Building Phase

Darrow (\$120M ARR forecast) and Lawtrades signal legal tech moving from early-adopter to mainstream. Legal executives are underserved by quality content — the media/podcast pipeline has real opportunity here.
